

GoLift Model GL3

Compact, Ergonomic, Material Handling Lift

The GL3 is a highly maneuverable, ergonomic, versatile material handling machine that features both power drive and powered lifting.

Many standard & custom end effector attachments available for specific applications that can be easily swapped to create a multi-tasking, lifting, moving machine.

Ideal for manufacturing operations, inventory positioning, repair facilities, mobile workstations, lab, office, repetitive lifting, resolving worker safety issues & increasing productivity.

When a forklift is too much and your back isn't quite enough....

GoLift is THE ANSWER!

Standard Features of the GoLift 3:

- Lift Capacity: 300lb (on 12" load center)
- Vertical Travel: 60" Total (you choose starting height 0"-59")
- Lift Speed: Variable to 12" per second
- Drive Speed: Variable
- Tooling: 2"W x 20"L Forks
- Counterbalanced
- Wheels: 13" or 10" (front drive) 6" (rear casters)
- Mast: Hand Jeweled Aluminum Enclosed Chain Drive
- Frame: Welded Carbon Steel
- Finish: Safety Yellow, Durable, Powder Coating
- Designed & Manufactured in the USA

GoLift Model GL3

Lifting the standard with these great features:

Overall Dimensions
39L x 20.5W X 79H
(not including tooling or load)

All Powered = Power Drive & Lifting.

- Allows workers of any size & strength to quickly & safely lift & move large heavy loads.

Single, Hand Jeweled, Aluminum Mast

- Single Column: Provides excellent visibility.
- Hand jewellery shows attention to detail & quality.
- Non Corrosive, Low Maintenance.
- "Soft Stop" Technology

Enclosed 24V DC Programmable Power

- No acid or hydraulic leaks.
- Battery life indicator.
- No maintenance.
- Programmable card allows performance characteristics to be customized per machine to match the application needs (ie lifting speed, acceleration, deceleration).
- Completely sealed electronics box for safe indoor & outdoor use.
- Two 12Volt 18Amp Hour Batteries: 2x work.
- Optional 12V or 24V powered tooling.

Durable Steel Frame & Lifting Deck

- Load tested strength.
- Standard forks are all steel for strength & durability.
- Back rest securely holds load on during transport.
- Optional quick change tool coupler allows machine to be fitted with multiple tools for efficiency.

13" Pneumatic or 10" Solid Front Drive Tire & 6" Rear Casters

- Offers steering and load stability with heavy loads.
- Swivel casters placed in the rear rather than front provide operator with easy, safe steering.
- Larger diameter wheels allow the machine to easily move over uneven surfaces, carpet, floor transitions and debris on the floor.
- Front fixed wheels keep machine moving in straight line, eliminating the tendency of front swivel casters to "crab walk".
- Larger wheels in front provide load stability, eliminating the risk of tipping forward.
- Optional puncture proof solid front tires.
- Optional turning brakes offer increased stability on slide sloping surfaces.

GoLift Model GL3

Operator Controls

- Ergonomic Design Improves Productivity
- Ergonomic handle angles adjust to the height of the user, maintaining a neutral arm & wrist position.
- Ant-vibration rubber handle grips.
- Large diameter handles reduces pinch force required.
- Inset handles eliminate hand and knuckle injury.
- Butterfly lift controls located on steering handles.
- Ability to lift and lower load safely while moving.
- Variable speed lift controls.
- Operator instruction panel clearly visible.
- Master power key switch offers security.
- Battery life indicator.

Power Lift & Lower

- Precise control of load position.
- Maximum vertical travel range.
- Prevents unintended load fall.
- Fastest lifting speed! 5 feet in 6 seconds.
- "Soft Stop" feature slows lift at top and bottom of lift cycle to create quieter and safer operation.

Counter Balanced Offers Heavy Lifting Power

- Standard Model Lifts up to 300 lbs. effortlessly.
- HD Model Lifts 600 lbs effortlessly.
- No outriggers allow forks to pick load from floor/pallet.

Compact Design

- Maneuvers easily through tight spaces.
- Fits through all standard doorways and elevators.

Safety Features

- Load fall protection
- "Belly Bump" backup auto break prevents operator from becoming stuck between machine and obstacles.
- Larger wheels prevent tipping.
- Lift controls located on steering handles keep the operator in control at all times.

Versatility of Use Optional End Effectors & Features

- Increased Lift Capacity (up to 600 lbs)
- Custom Lift Range
- Wider/Longer/Shorter Straddle
- Battery Capacity/Quick Recovery Charger
- Larger Lifting Deck or Forks
- Transfer Surfaces/Load Retriever
- Chair Stacking Fork
- Lifting Tongs for Kegs or Awkward Objects
- Garbage Can & Barrel Dumper/Rotator
- Tote Forks
- Telescoping Roll Handling Arm
- Jib with Hook (or Tool Handlers)
- Dumping Hopper
- Gas Cylinder Clamp
- Let Us Design a Tool For Your Application!
